■ Gold Nebula

Most often one might expect Modern or Modernist design elements to be Polished Chrome. At MODULIGHTOR of course, we customize our products to designer's specs and it's just as easy to plate in Nickel or Brass.

Usually Paul Rudolph's Nebula fixture is a ceiling mounted chandelier ([CH10](#)), but here it is a beautiful table model ([TB10](#)). After seeing it only in Polished Chrome all these years what a joy is it to see it in Golden Brass. It is *gorgeous!* Come see it in person in 2013.

Happy New Year!
