

MODULIGHTOR

Wagnetron - 5W LED LAMP

JOB - CLIENT - LOCATION
DESCRIPTION
Notes

Actual Size

Base Type - BA15 Double Contact

PERFORMANCE -

Power consumption 5 Watts
600 Total lumens
360 Degree light distribution
CBCP matches standard halogen lamps
Single light source
Single crisp shadow

Dimmable to 10%

Power Factor: 0.93
120VAC

COLOR

CCT: 2700K / 3000K
CRI > 80
White point accuracy within 3 SDCM
Rich saturated color rendering
Excellent color stability

OPTIMIZED FORM

Dimensions .8" X 2.42" / 21mm X 62mm
Proprietary ceramic design
provides superior thermal dissipation

LONG LIFE, LOW MAINTENANCE

Three year warranty

ENERGY EFFICIENT

Saves over 75-80% of energy compared to standard halogen lamps

INTENDED USE AND APPLICATIONS

LED retrofit lamp to replace 120VAC halogen lamps in Modulightor linear systems art lights, chandeliers, wall sconces and other indoor applications.

HIGHLY COMPATIBLE

Works with most forward phase dimming controls and systems. Although we have tested on most systems we do recommend site specific testing. LED's are not a direct replacement for incandescent and halogen light (see our technical papers) but they are a fantastic alternative

For more information and comparative theory of LED and other light sources, visit us at www.modulightor.com/technical

Modulightor is doing its part to design, manufacture and build installations responsibly with your help.

Thanks for coming -
